service bulletin

No. 90-12

Textured Decals – 1990 and Previous Mercury 70-275

Textured decals for the top cowls are no longer included with any of the decal sets as they were previously. They are not used on 1991 product which results in a smaller quantity being manufactured for replacement decal sets only. This increases the cost and would excessively increase the decal set cost. Instead of increasing the cost of the decal sets, we decided not to include the textured decals and sell them separately.
