Total Command, Joystick Inboard Control System

Models Affected

All yachts equipped with Total Command and Cummins DTS inboard engines.

Situation

Beginning in model year 2008, select yachts will be equipped with Total Command, a CAN-based system with Cummins MerCruiser Diesel DTS inboard engines that permits docking by joystick.

The joystick controls the bow thruster, stern thruster, and the engines and transmissions in both forward and reverse gears at reduced engine RPMs. Total Command also includes a touch pad for thruster control to allow precise docking without the joystick.

The serial number for the Total Command system is on the helm board.

Mercury MerCruiser will handle the warranty, service, and parts. All technical assistance for Total Command will be handled by the appropriate MerCruiser service organization.

The Total Command Owners Manual part number is 90-899883210. The Total Command service manual is scheduled to be released later this year.

For all engine related service and warranty questions contact your local Cummins representative.
