Removing a GPS Unit from Its Pedestal

Scope

Worldwide.

Models Affected

All Axius Premier packages.

Situation

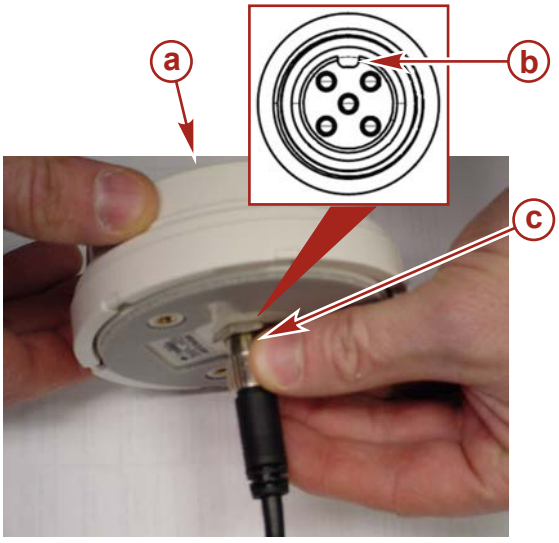

Removing a GPS unit from the pedestal requires special care to prevent twisting of the CAN H NMEA 2K harness.

1. Remove the three screws from the base of the GPS unit.
   IMPORTANT: Do not twist the base of the GPS from the pedestal.
2. Gently pull the GPS unit up from the base and support the GPS unit while turning the CAN H NMEA 2K harness connector counterclockwise.
3. Loosen and remove the CAN H NMEA 2K harness .
   IMPORTANT: The threaded connector must be completely loose before removal to avoid damage to the cable or GPS unit.

Installation

When installing, make sure the CAN H NMEA 2K harness does not twist in the supporting tube. If the base was removed, install the base to the standard marine mount pole before attaching the CAN H NMEA 2K cable and base to the GPS.

1. Support the GPS unit while connecting the cable.
2. Align the keyway of the CAN H NMEA 2K harness connector to the GPS unit connector and tighten securely.
