Satin Finished Torque Master & Sport Master Gear Housings

External Maintenance

After some use the satin finish on Torque Master and Sport Master gear cases may discolor from chemicals and alkaline in the water. To restore the original finish and color, buff the gear housing with a 3M Scotch Brite™ pad or wet sand with 400 grit sand paper.

If you wish to change the finish on a gear housing from polished to satin, wet sand the surface with 400 grit sandpaper.
