service bulletin

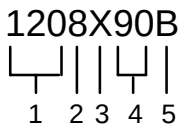

No. 91-7

Force Model Numbering System

This bulletin was prepared to help you understand the Force model numbering system. The model number provides the following information:

1. Horsepower
2. Driveshaft Length/Transom Height
   (Even Number - 20” Shaft) (Odd Number - 25” Shaft)
3. Brand
4. Model Year
5. Production Variant

EXAMPLE:

1. 120 = 120 Horsepower
2. 8 = 20 Inch Driveshaft/Transom Height
3. X = Bayliner, A = Maxum, F = Force
4. 90 = 1990 Model Year Engine, 9 = 1989, 8 = 1988, etc.
5. B = Second Production Variant
