Autoblend System on Force Outboards

The Autoblend System P/N 819229A1 can be used on all 1991 and newer models of the 70, 90 and 120 HP Force Outboards and all 150 HP Outboards from 1989 to present. These models have a fuel pump with the Booster Spring and Retainer which are necessary for this system fo function properly.

The Autoblend System can also be installed on any Force Outboard 35 HP thru 125 HP if the booster spring and retainer is installed in the fuel pump.

Part Numbers for these items are:

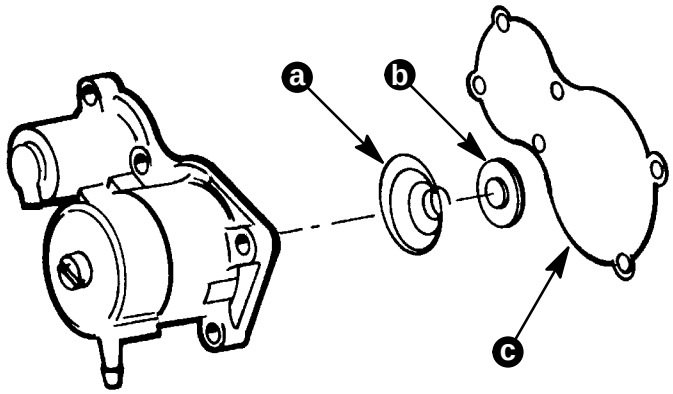

F686300	Booster Spring
F686096	Retainer

Parts can be ordered through you normal parts ordering system.

NOTE: It is always good practice to replace the fuel pump gasket and diaphragm when installing the booster spring and retainer in older engines.

Any parts added and/or replaced for the addition of the Autoblend system are an additional charge to the customer for installation.

IMPORTANT: Autoblend Systems cannot be installed on any L-Drive models. Coast Guard regulations on fuel systems will not allow this system to be used.

a - Spring P/N 686300
b - Retainer P/N 686096
c - Diaphragm
