A. MIE 7.4L INBOARD WITH FRONT MOUNTED CLOSED COOLING

Model

Mie 7.4L Inboard in Sea Ray 370 SDB

Cooling Kit

There is no Front Mounted Closed Cooling Kit available for this model engine. Because of boat construction, the rear mounted kit could not be installed on the engine. The boat manufacturer installs a MIE 8.2L Inboard Front Mounted Kit on these engines.

Replacement Parts

To order replacement parts for the Closed Cooling System on these engines, refer to the following:

Micro Fiche: MIE 8.2L, Card 56, Grid C3 and C4

Paper List: MIE 8.2L, 90-816713-90, Pages 28 and 29

These parts will fit the MIE 7.4L. The only part that will not fit is the hose that goes from the engine oil cooler to the heat exchanger. If you need this special hose, you will have to cut one to the correct length using a wire reinforced 1-1/4 in. (32 mm) I.D. hose.
